

## Certificate of Analysis

|                    |                                                            |
|--------------------|------------------------------------------------------------|
| Product Name       | Calendula                                                  |
| Botanical Name     | Calendula officinalis                                      |
| INCI Name          | Olea Europaea Fruit Oil (and) Calendula Officinalis Flower |
| Country of Origin  | South Africa                                               |
| CAS Number         | 8001-25-0 (and) 84776-23-8                                 |
| EC / EINECS Number | 232-277-0 (and) 283-949-5                                  |
| Lot Number         | 3425165                                                    |
| Manufacturing Date | January 11, 2026                                           |
| Retest Date        | 24 months from manufacture when stored as recommended      |
| Shelf Life         | 24 months                                                  |
| Document Date      | January 29, 2026                                           |

### Analysis Results

| Test             | Specification / Typical Range                                 | Result   |
|------------------|---------------------------------------------------------------|----------|
| Appearance       | Yellow to dark orange liquid.                                 | Conforms |
| Odor             | Characteristic floral with odour typical to refined olive oil | Conforms |
| Relative Density | Typical product range                                         | Conforms |
| Refractive Index | Typical product range                                         | Conforms |
| Optical Rotation | Typical product range                                         | Conforms |
| Solubility       | Insoluble in water.                                           | Conforms |
| GC-MS Profile    | Refer to accompanying GC-MS report                            | Conforms |

### Quality Statement

This certificate is prepared from current reliable source data and typical lot information available to West Coast Aromatics. Natural products may vary from lot to lot. The product is released to the best of our knowledge when stored and handled according to recommended conditions.
